# 1 Introduction

Bulkmanager helps you search content, media and members in Umbraco on various criteria and allows you to use bulk operations on selected items. The following bulk operations are supported by default:

- Delete
- Publish (content only)
- Unpublish (content only)

If you have a license you can use a lot more bulk operations, such as:

- Search media and members
- Move Documents and media
- Delete Media and members
- Assign member groups
- Bulk Lock/Unlock/approve members

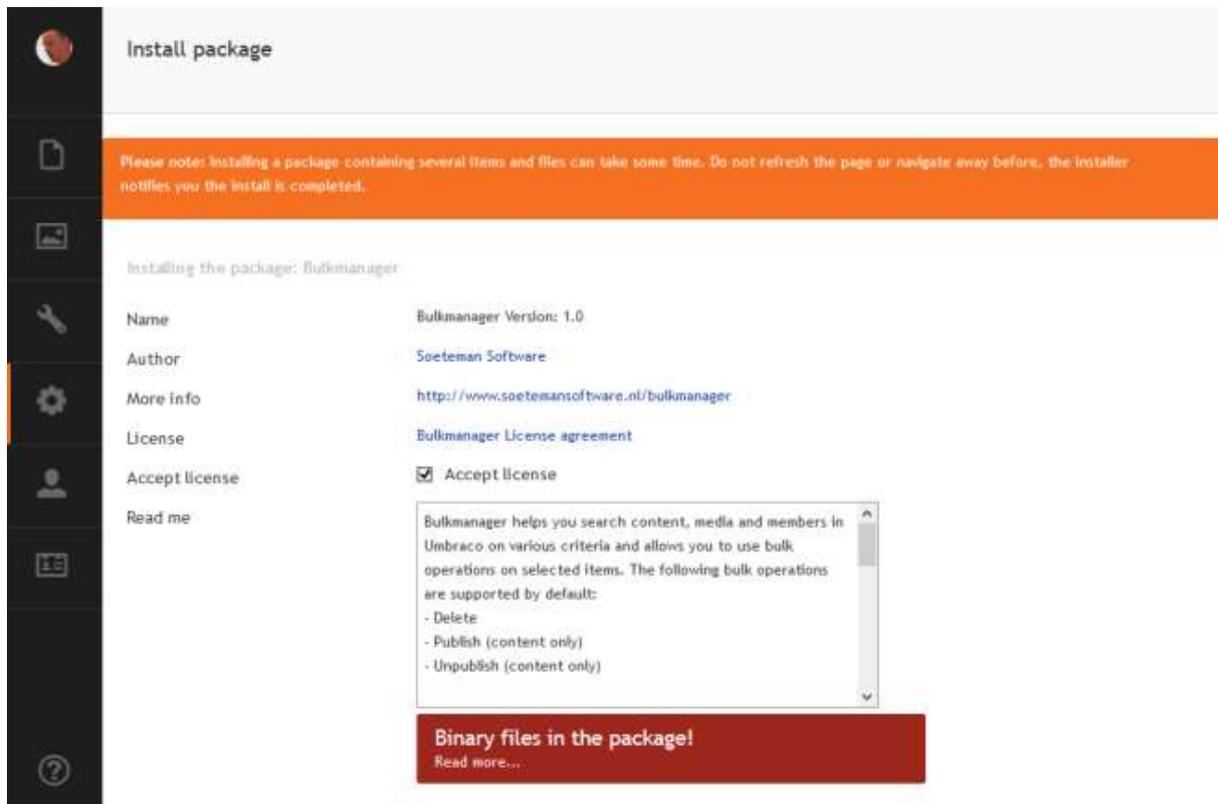

**Bulkmanager is compatible with Umbraco version 4.7<sup>1</sup> and up. Bulkmanager is compatible with SQL Server (Express) only.**

---

<sup>1</sup> Drag and drop columns is only supported in V7+

## 2 Installation

Install the Bulkmanager package using the Umbraco package installer.

Make sure that the installer has modify rights on the following folders:

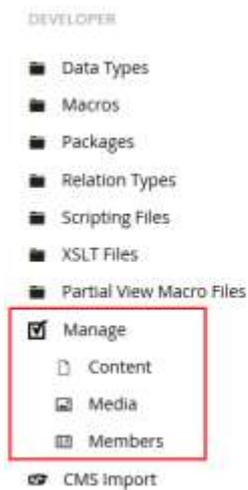

- /bin
- /app\_plugins

If for some reason you can't give the installer these rights, you can install the package manually. Read the chapter manual configuration how to do this.

Once the package is installed you have an extra folder in your developer section called Bulk manager. You might need a page refresh to see this folder.

## 3 Using bulk manager

In the developer section you see the new “Manage” tree open this tree and you will see the following items<sup>2</sup>. Click on the item you want to manage

### 3.1 Query data

Querying data is really simple select the fields you want to query on and fill in the criteria options.

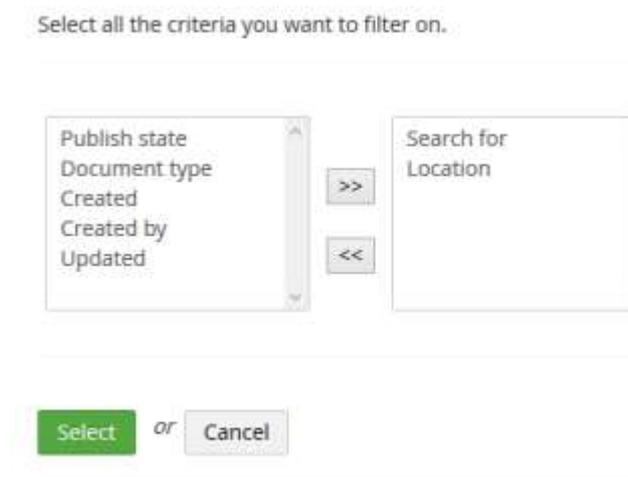

The screenshot shows the BulkManager V1.0 search interface. At the top, it says 'BulkManager V1.0'. Below that, a search instruction reads: 'Search select and modify content, use the plus and minus buttons to add/remove criteria you want to filter on.' The interface has three main sections: 1. 'Search for' with a text input field and a checked checkbox labeled 'Search in PropertyData'. A red '1' is next to the input field, and a red '2' is next to a minus sign button. 2. 'Location' with a 'Choose...' dropdown and an unchecked checkbox labeled 'Include all childnodes'. A red '3' is next to the checkbox, and a plus sign button is to its right. At the bottom left, there is a green 'Search' button.

1. Current filter criteria you want to use to query the data.
2. Click on the minus sign to remove criteria
3. Click the plus sign to select extra filter criteria

<sup>2</sup> When you don't have a license you will only see the content item

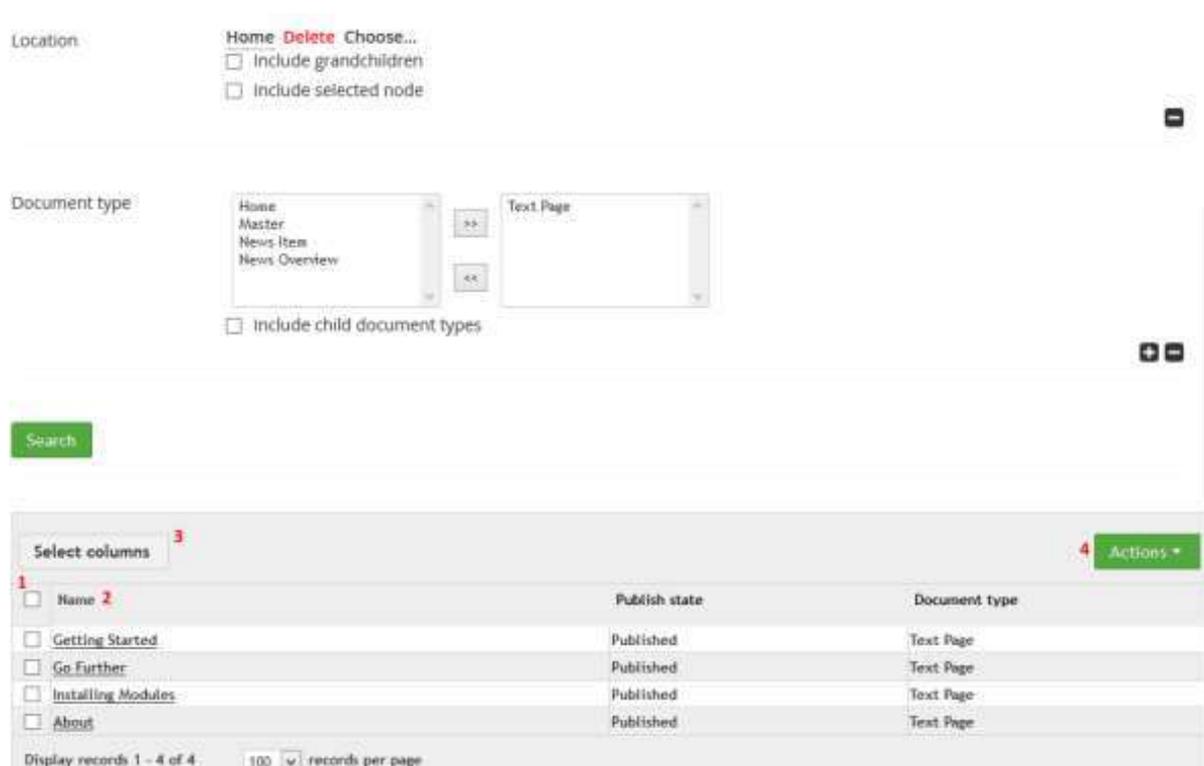

### 3.2 Select criteria options

When you click the plus sign you can add extra criteria you want to use to filter the data

### 3.3 Overview

When you select "Search" the following overview will be shown

1. Select/Deselect all items.
2. You can sort every column. Just click on the name of the column. When you click twice the column will be sorted in descending order
3. Select additional columns.
4. When you have selected all the items you want to apply the bulk action on you can select the action from the actions menu.

### 3.4 Select additional columns

When selecting the “Select columns” option the dialog below will open. Select all the items you want to display and choose the “Select” option to add them to the overview. (system) fields are default Umbraco fields.

Select all columns to display in the overview.

### 3.5 Drag and drop columns in overview

Dragging a columnheader to a different column will sort the columns.

### 3.6 Execute bulk action

When you have selected the action a dialog will appear where you need to confirm the bulk action.

Are you sure you want to publish the selected items?

When you have confirmed the bulk action it will execute. Cancel the bulk action will close the dialog.

### 3.7 Save search criteria

When you need to repeat bulk tasks with the same criteria (for example bulk publish all unpublished pages) several times, you can use the save option to save the search criteria in its current state to the database. Just press the save button on the Bulkmanager page.

BulkManager V1.2 Save

---

Search select and modify content, use the plus and minus buttons to add/remove criteria you want to filter on.

---

Publish state  +

---

Search

### 3.7.1 Save options

BulkManager V1.2 Save Cancel

4   5

---

Save search criteria into the database, so you can use them directly the next time you need to query the same data.

---

Save as 1

---

Immediately show data 2   
When enabled data will be shown directly when the user opens this search form

---

Only for me 3   
When enabled this search form will only be visible for me in the tree.

1. Name as shown in the tree
2. When selected the data will be shown immediately when opening the saved item without the user having to use the search button.
3. When checked the saved item is only visible for the person who saved the definition.
4. Saves the options to the database
5. Cancels the operation and returns to the Bulkmanager page.

### 3.7.2 Saved definitions in the tree

After save you will see the saved criteria in the menu tree.

Manage

Content

Unpublished data

Media

Members

## 4 Manual Installation/Configuration

If you renamed the Umbraco folder or for some reason can't give the installer sufficient rights to create tables in the database, or the sufficient rights to modify the following folders /bin, /app\_plugins you need to install Bulkmanager manually.

### 4.1 Manual installation of files

- Open the folder in the zip file.
- Copy all **.dll** files to the /bin/ folder.
- Create the following folders
  - o /app\_plugins/BulkManager
  - o /app\_plugins/BulkManager/css
  - o /app\_plugins/BulkManager/images
  - o /app\_plugins/BulkManager/js
  - o /app\_plugins/BulkManager/pages
- Copy all **\*.css** files to the /app\_plugins/BulkManager/css folder
- Copy all **\*.png** files to the /app\_plugins/BulkManager/images folder
- Copy all **\*.svg** files to the /app\_plugins/BulkManager/images folder
- Copy all **\*.js** files to the /app\_plugins/BulkManager/js folder
- Copy all **\*.aspx** files to the /app\_plugins/BulkManager/pages folder
- Run the script below to create the database table
 

```
CREATE TABLE [dbo].[BulkmanagerState] (
  [Id] [int] IDENTITY(1,1) NOT NULL,
  [StateId] [uniqueidentifier] NOT NULL,
  [Name] [nvarchar](150) NOT NULL,
  [ProviderId] [nvarchar](50) NOT NULL,
  [BindOnLoad] [bit] NOT NULL,
  [UserId] [int] NOT NULL,
  [state] [nvarchar](max) NOT NULL,
  CONSTRAINT [PK_BulkmanagerState] PRIMARY KEY CLUSTERED
(
  [Id] ASC
)WITH (PAD_INDEX = OFF, STATISTICS_NORECOMPUTE = OFF, IGNORE_DUP_KEY = OFF,
ALLOW_ROW_LOCKS = ON, ALLOW_PAGE_LOCKS = ON)
)
```
- Add the following snippet to the /config/trees.config file.
 

```
<add initialize="true" sortOrder="9" alias="bulkmanagerTree" application="developer"
title="BulkManager" iconClosed="folder.gif" iconOpen="folder_o.gif"
type="BulkManager.Core.Umbraco.Trees.BulkManagerTree,BulkManager.Core" />
```
- Add the following snippet to the /umbraco/config/UI.xml file.
 

```
<nodeType alias="bulkmanagerTree">
  <header>Bulk manager</header>
  <tasks>
    <delete assembly="BulkManager.Core" type="Umbraco.Tasks.DeleteTask" />
  </tasks>
</nodeType>
```

**If you purchase a license (.Lic) file. Put that in the Bin folder of your Umbraco install!**

## 5 Troubleshooting

### 5.1 I don't see the Bulkmanager package in my developer section

Make sure you have sufficient rights to install the package. See chapter 2, otherwise perform a manual installation see chapter 5.

### 5.2 I can only manage content.

In case you want to use Bulkmanager for other items than content make sure you have a license.

### 5.3 I get an Invalid License exception.

Make sure you've bought the correct license for the (sub)domain, or an unlimited license and added the license file to the bin folder. Contact [support@soetemansoftware.nl](mailto:support@soetemansoftware.nl) for help.

### 5.4 How can I select more query fields?

Use the + sign for more filter options.

### 5.5 I can't see the developer section.

Make sure you have enough rights to view the developer section in Umbraco. Contact your system administrator.
